Environmental Policy

HRE Policy

HRE-ENV-POL-001 Issue 3.0

It is the policy of Hitachi Rail Europe Ltd. and my personal commitment as Managing Director to protect the environment and minimise potential environmental impacts of key stages of our business lifecycle, including: planning, design, manufacturing, testing, maintenance and decommissioning.

We are committed to achieving this as follows:

- Fulfilling all of the compliance obligations, including UK and EU legislation and other environmental obligations, to which we have subscribed;
- Identifying our environmental risks and opportunities and significant environmental aspects and impacts;
- Implementing robust processes and control measures that prevent environmental incidents and minimise any potential impact on the environment;
- Establishing design and purchasing standards and on-site processes which promote resource efficiency;
- Influencing suppliers and contractors to adhere to this policy;
- Promoting environmental awareness, and providing training and guidance to all colleagues;
- Maintaining effective relationships with industry partners, regulatory bodies and key stakeholders and understanding their needs and expectations;
- Evaluating and continuously improving our environmental performance and the effectiveness of our Environmental Management System using Key Performance Indicators.

We will review this Policy annually, or after any significant change, to ensure that it continues to reflect our commitments.

Karen Boswell
Managing Director
Hitachi Rail Europe Limited
